Since the inception of the weather and traffic coverage on XM Radio, I have found it most useful since the conditions are reported much more promptly than on the commercial radio stations who, in most cases, only report traffic and weather infrequently during the hour. Personally, I use XM Radio Instant Traffic & Weather most often when I am in the Dallas/Fort Worth area. Due to the delay with which the local broadcasters report traffic and weather, it is most reassuring to be able to receive almost instant reports on XM Radio.
